EXPERIENCE

Full Stack Developer

Badho Technologies

📅 07/2024 - Present   📍 Delhi, India

A technology company focused on connecting local kirana stores with the distributors and companies

- Built the complete KYC verification flow for Badho's buyer and seller apps, enabling seamless user onboarding
- Developed the purchase order dispatch feature for the seller app, streamlining order acceptance and delivery experience for distributors
- Integrated push notifications using Firebase Cloud Messaging, AWS SQS, and Hasura event triggers across all Badho apps (Buyer, Seller, and Sathi)

Full Stack Developer Intern

Badho Technologies

📅 03/2024 - 07/2024   📍 Delhi, India

A technology company focused on connecting local kirana stores with the distributors and companies

- Implemented 'Employee Master Sign-In' feature for support users to impersonate ground staff and debug issues efficiently
- Built 'My Sellers' module in Buyer app, displaying verified nearby sellers with actionable information

Full Stack Developer Intern

Blackhat Code Technology

📅 08/2023 - 11/2023   📍 Delhi, India

A technology firm specializing in e-commerce development

- Enhanced the checkout flow on the Dochomoe e-commerce platform
- Built a dynamic admin dashboard for product management with add/edit/delete and analytics functionality

EDUCATION

B.Tech

Bhagwan Parshuram Institute of Technology

📅 08/2020 - 05/2024   📍 Delhi, India

SKILLS

| Docker | Git | Google Firebase | GraphQL | MongoDB | PostgreSQL | React | React Native | SQS |

| Redux Toolkit | Node.js | Express.js |

PROJECTS

GroGo - Grocery Delivery App

📅 01/2023 - 04/2023   📍 Delhi, India

A grocery delivery application that allows users to order groceries online with real-time tracking

- Built using React Native with Redux Toolkit and Mapbox integration for real-time location mapping
- Implemented Stripe payment gateway and microservices architecture for scalability
- Used RabbitMQ for inter-service communication and Docker for containerization

BPIT Student Management System

📅 06/2023 - 09/2023   📍 Delhi, India

A student management system for managing educational records and communications

- Built backend services using Django and Node.js for attendance, results, notices, and events
- Parsed university result PDFs and stored structured data in PostgreSQL
